# GERMINATION OF SEEDS

# COMMERCIAL USE

- **Water Efficiency:-**

Use 95% less water than traditional soil based agriculture.

- **Faster Growth and Higher Yields:-**

By providing optimal level of oxygen, water and nutrients directly to the roots.

- **Year Round Production:-**

Setup indoors and in controlled greenhouse environment.

- **Space efficiency:-**

Vertical design allows for high density planting and can be installed in balcony or terrace or any garden with minimum sunlight required of 3-4 hours.

- **Reduced Disease Risk:-**

The soilless nature of aeroponics virtually eliminates soil-borne diseases and pests.
